Male Genitals	Scrotal Circumference	6	5	0
	Testicles	5	3	0
	Sheath	7	3	0
	Penis	8	3	0
				9

Big Mac's point deductions from this classification were almost entirely in the Muscling, Head/Neck, and Midsection Trait Areas. Importantly for our breeding program these deductions were in the directions we want to move our herd.

Big Mac lost points in muscling for having loin/rump muscling and hind quarter muscling that are more expressed, fuller and somewhat bunchier. These are traits that we want our herd to express more in the direction that Big Mac has – that is a fuller, deeper, heavier rear quarter.

The majority of the Big Mac deductions from the classification were in the midsection area. Big Mac's body length was at the maximum, his spring of rib and chest depth were also near the top of the scale. All traits we hope to impart to our herd. Big Mac scored near the top of the scale on masculinity.

Big Mac is outstanding AI bull to use on your herd that improves udders, teat size and placement and if you want to improve overall body capacity - length, depth, spring of rib and heart girth than Big Mac will move your herd in that direction.

Rainbow Hills Big Mac classified as Excellent.
